

~~Ins. a1~~
B17 W
(7)

the connection of a bone screw (12) head (13) of the bone screw (12) lies in contact on a counter-surface of the securing screw (15) which can be screwed into the counter-surface (25). In this the distance (20) is chosen such that it is less than or equal to the length of the bone screw (12), whereas the screw head (13) of the bone screw (12) is positioned at the end (20) of the securing screw (15) and the screw head (13) terminates with the upper side of the counter-surface (25).
